Scope of Work: Cellular Wireless Router Installation

This document outlines the scope of work for the installation of a cellular wireless router at your designated location. This service includes a comprehensive site survey, preparation and installation of the router, and basic configuration to ensure your devices are connected. Please note that this service does not include network cabling.

Summary of Services

Our team will install a cellular wireless router, performing the following key steps:

- Site Survey: Assessment of location for optimal router placement
- Router Preparation: Unboxing and component verification
- Mounting and Installation: Secure mounting with component connections
- Basic Router Configuration: Cellular connection and Wi-Fi setup
- Device Configuration Support: Connect up to 5 devices to wireless network

Our Process

Detailed breakdown of installation steps:

1. Preparation and Planning

- Location Determination: Site contact collaboration for optimal router placement within 5 feet of power outlet
- Hardware Verification: Component check and documentation review
- Documentation Review: Manufacturer installation guide review

2. SIM Card Installation

- Power Off: Complete router shutdown before SIM insertion
- SIM Card Slot Location: Locate slot typically on side or back of router
- SIM Card Insertion: Careful insertion with correct orientation using provided tool
- Secure Cover: Replace SIM card cover securely

3. Mounting (Optional)

- Wall Mounting: Secure wall mounting if desired with appropriate hardware and neat cable routing

4. Antenna Connection

- Antenna Attachment: Secure attachment of detachable antennas with proper alignment

5. Power Connection

- Power Adapter Connection: Connect adapter to router power input and suitable outlet
- Power On: Router startup and indicator light observation for boot confirmation

6. Network Connection

- Wireless Connection (Wi-Fi): Device connection using provided SSID and password

7. Router Configuration

- Configuration Interface Access: Web browser access via router IP address
- Login and Password Change: Default credentials entry and immediate password change for security
- Cellular Connection Configuration: APN configuration from cellular carrier
- Network Settings (Optional): DHCP, DNS, and firewall configuration as needed
- Connection Test: Internet speed test verification via browser

8. Device Configuration (Up to 5 Devices)

- Device Connection Support: Hands-on assistance connecting up to 5 existing devices to wireless network

Estimated Time On-Site

The estimated time on-site for this installation is 1 hour.

Additional Labor Hold

Price: \$380.00

While we aim for completion within a typical timeframe, the final charge will accurately reflect the actual time our team spends on-site. This includes the minimum service fee plus any additional time (billed at \$190 per hour in 15-minute increments) needed for extra work or unforeseen issues. A preliminary Credit Hold of \$380.00 in total Hold Amount. This will cover most external penetrations, or ceiling issues.
